Incorporated in 2003, NEXINT is owned by its founders. We conceive, develop and sale LightStorm, the first universal web platform. Carrying a broader concept of global content management and Inter, Intra or Extranet services, LightStorm technology includes subgroups such as:

- Interactive Marketing platform: profiling, eMailing, eCRM and eCommerce
- Collaborative work and engineering platform
- Digital management of documents and filing

Unique technologies such as Ezaccess and OpenCert are an addition to our catalog, offering important functionalities of accessibility and security, already used by prestigious organizations.

NEXINT, willing to seize rising opportunities in deeply reshuffled market, is anticipating the repositioning of our competitors and the massive expansion of easily obtainable CMS applications. Thus NEXINT is expanding its global reach through international and multi-channel sales.
